Personal Projects

PORTFOLIO joao-ethan.github.io/Portfolio/en/  github.com/JOAO-Ethan

2022 - Ongoing - GEODE Project

Creation of a relational database in order to facilitate mineralogical collections' management. This database will come with a software developed in Java and with a feature that can be used to identify stones.

2022 - Ongoing - Zelda-like video game

Development with JavaFX of a game inspired by the first "The Legend of Zelda".
The goal will be to gain points by killing enemies that appear randomly on the map.

2021 - web page for a life-size role-playing games fictive company

Coding in pair of a website that propose services linked with role play (life-size role-playing games, Escape Games, murder parties and battle reconstructions). I was in charge of the programming process, especially the HTML and CSS parts. I also helped with the activities ideas.
